Yo G-P here.

I have no clue what the previous group is doing with this series, but it has been a while since the last chapter. I know a bit about photoshop and thought what the hell, might as well give it a shot.

I did the cleaning, redrawing and typesetting.

The translation is taken from the guys at booru so if you have any complaints about that, go vent there.

I only made minor changes (i.e. interested to curious).

Give a yell in the comments if you would like me to continue this. This is my first work on manga things, but I think it turned out okay.

This also took longer than expected. Time for a nice cold Chimay.

See you around Mangadex I guess.
